

# RXi – Industrial Monitor

## The Definitive Industrial Display Experience

To succeed in an outcome-driven world, businesses must operate faster and leaner, while being increasingly connected with both local and global data. At Emerson, we've reimagined automation architecture to help you thrive in today's demanding business environment. This architecture ensures that relevant information is readily available to operators, so they can make the best decisions in real time. Highlighting this reimagined architecture, Emerson has gone back to the drawing board to create the "Definitive Industrial Display Experience". The result is the RXi – Industrial Monitor display portfolio with multiple options of modular screens to maximize flexibility, performance, and durability.

### Modularity and Flexibility

The RXi – Industrial Monitor portfolio ranges from 12" to 24" screens in a widescreen format, with 12" and 15" models available with outdoor Sunlight Readable (SLR) screens. The modular nature of the unit offers a substantial amount of flexibility in configuring your RXi – Industrial Monitor. You can easily swap an indoor screen for an outdoor screen, change screen sizes, or replace a damaged screen, while utilizing the same backing module. Recognizing that effective processes requires proper visualization, the RXi – Industrial Monitor portfolio offers more capabilities than ever. With the included Display Port-In and Display Port-Out on every industrial monitor, you can take advantage of MST Daisy Chaining to simplify your architecture.

### Designed for Visualization

The RXi – Industrial Monitor approaches visualization with precision in mind. The multitouch, projective capacitive screens use high resolution, vivid graphical capabilities and quick response times ensuring that relevant information is readily available to both see and interact with. This enables operators to make quicker and smarter decisions utilizing a high-performance platform that lowers total cost of ownership.

### Anytime, Anywhere: A Range of Applications

This portfolio has offerings which effectively operate in temperatures as high as 65°C and as low as -20°C. Modules can be implemented outdoors with available Sunlight Readable (SLR) UV rated screens. The RXi – Industrial Monitor has products that meet the most rigorous of certifications and IP66 rated screens that protect against dust, moisture, and even direct water jets. The RXi – Industrial Monitor provides you with a solution that is designed to go where you need it to.

### Display Technology: Designed to Maximize UX

The RXi – Industrial Monitor takes industrial displays into today's connected world, by combining design, durability, and power in an ultra-slim package perfect for the factory floor. A sleek and powerful user experience (UX) connects people and machines with the latest in touchscreen technology and widescreen displays. The capacitive, multitouch screens can be used while wearing personal protective equipment and are as sensitive as the latest smartphone. Furthermore, the outdoor rated Sunlight Readable (SLR) screens provide brightness ratings nearly double that of the brightest smart devices. The optically bonded screens feature UV protection which vastly reduces reflections and glare, providing operators with vivid, clear images for more complete and enhanced process visualization.
